When time and safety are critical, the Clarus Pediatric stylet is a portable and durable tool for a swift and conclusive intubation.

- Sized specifically for delicate pediatric airways
- Fiberoptic technology provides superior vision for a gentle intubation
- Reusable and versatile, giving you incomparable value
- Works in conjunction with many LMA's
- Portable and reusable stylet that shapes to fit your patient's difficult airway
The Clarus Pediatric is designed to give you superior access to the pediatric airway. With its malleable stylet and atraumatic tip, the Clarus Pediatric gives you the size and features needed for a successful intubation. Optimum grade fiberoptics and a high-resolution eyepiece make this stylet a must for those working with delicate airways.

- Conveniently sized for portability
- High-resolution eyepiece for confident placements
- Port for oxygen insufflation
- Malleable stylet accommodates ET tubes size 5.5 and below
- Atraumatic tip helps protect sensitive airways
- Soakable stylet and light source allow for safe and efficient sterilization
